

Wide angle swing-away

Up to 55mm offset

Compact height (55mm)

Dreamline Saddleback swing-away lateral brackets are slim & ergonomically shaped, designed to operate seamlessly in close proximity to the user. Their compact lightweight design is robust for long-term durability. The release mechanism is a toggle which can be activated by being pressed or pulled. The toggle is flush with the bracket for unrestricted arm movement & cannot be accidentally activated. A separate pull tab can be fitted for users who wish to self-release. Dreamline lateral pads are slim for natural arm movement & have a layer of viscoelastic Sunmate foam for enhanced comfort. Covers are easily removable for cleaning & are machine washable. Multiple pad styles & sizes ensure the right fit & support to the user.
