

D's LOCKS

TIRED OF BRAKES THAT DON'T WORK?

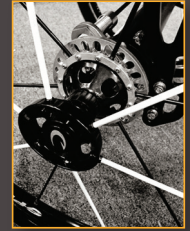

D'S LOCKS are revolutionary hub locks (brakes) for manual wheelchairs. They take the place of Push-Pull or Scissor style brakes. D's Locks work independently of the tire by locking the wheel at the hub. Tire types and air pressure no longer matter. With one lever, both of your wheels can be locked securely in place simultaneously, regardless of the tire condition.

D's Locks mount completely out of the way, so thumbs stay intact. Additionally, the brakes are no longer the widest part of the chair. In most cases they add little to no width. D's Locks can be installed in less than an hour. No special tools are required.

KEY BENEFITS OF D'S LOCKS

- Single lever positively locks wheels in place
- Locks can be engaged and disengaged easily, even with limited hand control
- Lockset lever can be mounted almost anywhere for user convenience
- Adds no width to most wheelchairs
- Wheels can be removed and replaced while D's Locks are engaged
- Compatible with most everyday wheelchairs and wheels
- Simple installation

D's Locks are an absolute must for every person in a manual wheelchair. I feel completely secure that my D's Locks will hold during transfers. The locking system is attached at the hub of the wheel so I no longer worry if my my brakes will hold in wet conditions or if my tire pressure has decreased. I have been using D's Locks for 10 years and can't imagine going back to any of the standard locks currently offered. D's Locks are durable, their staff is accommodating, and the product is simple yet inspired. D's Locks are also proudly made in the USA. D's Locks needs to be on every veteran's chair.

~ Al Kovach, Jr., US Navy SEAL (retired)

I just got my new D's locks installed on my Ki Mobility Tsunami. I have always had problems with fitting scissor locks on my chairs because I run a 25" 559 wheel & 4 inches of center of gravity on a 15 inch deep chair. Wheel lock problems no more! I love the positive feel of the locks even when my tires are wet. I have been riding wheelchairs for about thirty years now and I feel they are one of the greatest innovations to come along in a long time.
